

Job Title: Android Developer - Mobile Applications

Department: Mobile Development Team

Reports To: Head of Mobile Development

What we're looking for:

We are looking for an Android Developer with at least 2 years hands on software development experience, and at least 1 year in focused Android development.

We need someone that wants to work with a team of like-minded mobile apps developers to build amazing applications. You will be solely responsible for your portfolio of Android apps and expected to design and develop from outline with minimal guidance. We love autonomy and work in a fast paced environment.

This position is based in Morodo's Beijing office.

Experience

1+ years of experience developing Android Application

2+ years experience working with another mobile platform

Must have created and released at least two major commercial apps on Android (We will want to see the apps in Market)

Should have deep skills with developing "Services" vs "Activity" based code on Android

Strong Java with XML (used to query via Web Services)

Experience with corelib, core functions

Develop current and next-generation Android apps from scratch, and based on our existing portfolio of Apps
Measure and characterize performance of one or more Android modules, and suitably improve performance as needed

Develop abstractions to hide platform specific capabilities

Qualifications

BA/BS in Computer Science or equivalent experience

English at Advanced Level if not your native language
